All skin types. Ideal for normal, oily, combination and acne-prone skin.

SKIN CONCERNS

Hyperpigmentation
Sun damage
Dullness
Acne + breakouts
Textural irregularities

200mL shower-friendly bottle with press-down security cap.

daily exfoliating facial scrub

A dual-action scrub with Glycolic Acid and exfoliating beads to refine skin texture.

DESCRIPTION

A dual physical and chemical exfoliating scrub designed to polish and refine skin texture. Glycolic Acid gently exfoliates without irritation while smooth, round beads buff away dead skin cells, revealing a brighter, smoother complexion.

BENEFITS

- Chemical exfoliation gently removes dead skin cells, promotes cell renewal and minimises the appearance of hyperpigmentation
- Smooth, round biodegradable beads polish the skin by manually sloughing away dead skin cells
- Improves skin texture and tone for a brighter, smoother complexion
- Assists with the penetration of subsequently applied active products
- Gentle enough for daily use

KEY INGREDIENTS

14% Glycolic Acid (AHA)

- 14% Glycolic Acid buffered complex gently exfoliates and removes dead skin cells to improve skin tone and texture
- Promotes cell renewal and stimulates collagen production
- Improves the appearance of sun damage and hyperpigmentation
- As the smallest Alpha Hydroxy Acid (AHA) available, it has the most effective skin penetration

DIRECTIONS FOR USE

Apply a small amount to damp skin after cleansing. Massage gently for 30 seconds and rinse thoroughly with water or deluxe facial cloth. Alternatively, mix with prescribed asap cleanser prior to application.

For sensitive skin, a gradual introduction is recommended.

PRECAUTIONS

- When using products containing AHAs, always apply sunscreen and limit sun exposure
- Not recommended for compromised skin conditions such as rosacea, eczema or dermatitis without a test patch
