

usage guide

SKIN TYPES

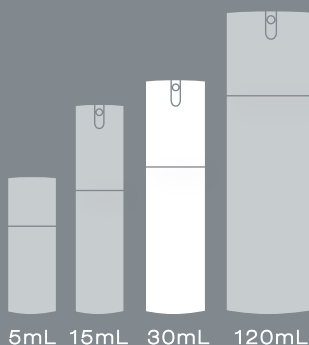

All skin types. Ideal for dry or ageing skin.

SKIN CONCERNS

Fine lines + wrinkles
Dry + dehydrated
Sun damage
Redness + rosacea
Dullness

30mL airless packaging protects against oxidation, contamination and product wastage, and features a fill level indicator window.

DNA renewal treatment

An advanced anti-ageing treatment that helps smooth wrinkles and repair DNA damage.

DESCRIPTION

This advanced anti-wrinkle treatment combines Telomere Technology with a Multi-Peptide Complex to smooth fine lines and wrinkles while repairing and protecting against DNA damage. A HydroElastic Complex enhances epidermal hydration, while Stem Cell Technology boosts cell renewal and stimulates epidermal regeneration. This revolutionary treatment contains high concentrations of active ingredients that work at the cellular level to help repair and prevent premature ageing.

BENEFITS

- Protects and repairs DNA damage and provides future telomere protection
- Prevents and visibly reduces the appearance and depth of wrinkles
- Stimulates stem cell activity, enhancing skin cell renewal
- Promotes epidermal regeneration to improve the look of wrinkled skin
- Increases hydration and provides resistance to dehydration
- Activates production of elasticity and collagen, resulting in a decrease in wrinkle depth by up to 96% in one month
- Can help reinforce the skin's natural barrier protection levels to that of a healthy 22-year-old's skin
- Boosts and maintains the skin's natural moisture level, resulting in smoother, more supple skin
- Lightweight, creamy texture

KEY INGREDIENTS

Telomere Technology

- Telomeres are an essential component of human cells that are vital to our skin health and affect how we age
- Helps to boost TRF2 protein (a telomere protein) to help preserve telomere stability
- Protects against future DNA damage
- Helps maintain Lamin A, providing stability and strength to ageing cells
- Improves the appearance and depth of wrinkles

Multi-Peptide Complex

- A powerful chain of peptide actives that helps delay the ageing process by protecting and repairing DNA damage
- Stimulates skin cells' natural repair pathways to protect against DNA reproduction damage
- Boosts cellular renewal
- Reduces wrinkle depth by up to 63% in 28 days

Stem Cell Technology

- Promotes epidermal regeneration and thickness, improving the look of wrinkled skin
- Reduces skin fragility
- Helps to reduce the appearance of wrinkles in seven days

HydroElastic Complex

- A potent hydrating complex containing Polyglucuronic Acid and marine extract Alaria Esculenta that can help reinforce the skin's natural barrier to that of a healthy 22-year-old's skin
- Stimulates hyaluronic acid and collagen production to increase skin hydration and smooth fine lines and wrinkles
- Provides both deep and surface-level hydration, and resistance to dehydration
- Enhances and preserves skin elasticity and suppleness by reducing elastin and collagen degradation
- Protects against free radical damage
- Enriched with Omega 3, 6 and 9

Anti-Pollution Complex

- Jojoba, Olive Seed and Macadamia provide moisturising, soothing and protective properties
- Enhances skin barrier recovery and provides future protection
- Increases skin hydration in both the short- and long-term
- Increases elasticity and firmness in aged and sun-damaged skin
- Can help reinforce the skin's natural barrier protection to levels of a healthy 22-year-old's skin

DIRECTIONS FOR USE

Apply one pump after serums. Follow with moisturiser or night cream.

For oily and acne-prone skin, apply 2-3 times per week in the [PM](#).

PRECAUTIONS

N/A
