

usage guide

SKIN TYPES

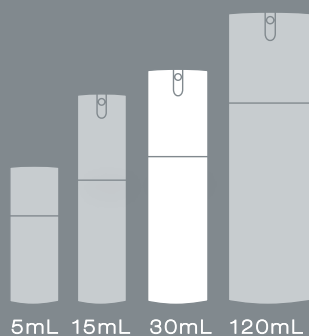

All skin types except active acne.

SKIN CONCERNS

Hyperpigmentation
Sun damage
Dullness
Fine lines + wrinkles
Textural irregularities

30mL airless packaging protects against oxidation, contamination and product wastage, and features a fill level indicator window.

super C complex

A high-potency Vitamin C with 20% L-Ascorbic Acid that promotes a brighter, more even complexion.

DESCRIPTION

This high potency Vitamin C serum combines 20% L-Ascorbic Acid with powerful antioxidants, including Pycnogenol, Coenzyme Q10 and Olive Extract, to help prevent and reduce the appearance of hyperpigmentation, diminish the signs of ageing and promote a brighter, clearer and more even complexion.

BENEFITS

- Helps prevent and reduce the appearance of hyperpigmentation
- Assists in the prevention of photo-ageing
- Stimulates collagen production
- Helps fight free radical damage
- Encourages skin healing
- Improves skin texture, tone and brightness

KEY INGREDIENTS

20% Vitamin C (L-Ascorbic Acid)

- The most effective form of Vitamin C to penetrate the skin barrier to increase Vitamin C levels in the skin
- Inhibits skin melanin production, reducing the appearance of dark spots and hyperpigmentation
- Protects and accelerates the production of collagen to help keep skin plump and firm
- A powerful antioxidant and brightening agent that helps neutralises free radicals, protecting against UV light and environmental aggressors
- Can double the protection against free radical damage when combined with other antioxidants
- Airless pump bottle protects from oxidation by minimising exposure to air and light, maintaining its potency

Pycnogenol® (Pine Bark Extract)

- Antioxidant-rich extract that helps to protect the skin from damage caused by environmental aggressors
- Reduces the appearance of hyperpigmentation
- Anti-inflammatory properties to help reduce facial redness
- Protects the collagen matrix
- Accelerates wound healing and reduces scar formation

CoEnzyme Q10 (Ubiquinone)

- Antioxidant that occurs naturally in the cells of the body
- Helps reduce free radical damage
- Aids in the repair of cells
- Reduces the appearance of fine lines and wrinkles
- Brightens the skin
- Applied topically, it helps replenish CoQ10 levels that decline with age

Hydroxytyrosol (Olive Extract)

- Antioxidant and free radical scavenger that protects against skin damage caused by environmental aggressors
 - Influences melanin production to help prevent and reduce hyperpigmentation
 - Anti-inflammatory properties
-

DIRECTIONS FOR USE

Apply in the **AM**. Alternatively, mix with **super B complex** or N20 peptide complex prior to application.

Not recommended for use on active acne but can be prescribed in the healing stage of acne.

A slow introduction is recommended for compromised skin conditions. Mix with **super B complex** twice weekly, gradually increasing as tolerated.

PRECAUTIONS
